Subject: Davenport Green consultation

Dear Simon,

The Labour Group would like to put an official response to the Council's consultation regarding Davenport Green as follows :-

The Labour Group supports this land returning to green belt status. This would provide a green lung buffer zone between Altrincham/Hale/Bowden communities from the developing Airport City proposals.

It is clear the Airport wishes to extensively develop it's business over the coming years. The future development plans of the airport are good for the local and regional economy, growth and jobs. However the need to protect areas like Davenport Green become stronger so that our local communities are protected against creeping airport development.

It is for this reason we believe that green belt status helps to build into the Council's planning polices the protection of Davenport Green and our local communities ageist such developments.

Best wishes
David Acton
Leader of Trafford Labour Group
