**Further Council Response in Relation to
MMIQ1.15 – Key Diagram**

4th March 2011

Introduction

Following discussion at Hearing Session 1 of the Core Strategy Examination the Inspector requested that the Council re-consider its approach to the identification of areas at risk of flooding and areas benefiting from defences on the Key Diagram. Having given further consideration to this matter, the Council considers that the key Diagram should be amended and that further consideration to identifying areas at risk of flooding and areas benefiting from defences on the Proposals Map will be given through the preparation of the Land Allocations DPD, in discussion with the Environment Agency.

Council Response

The Key diagram can be amended to remove the areas at risk of flooding and areas benefiting from defences from the Key Diagram. Suggested Change 300.04 details this amendment.

Suggested Change 300.04

Amend the Key Diagram to remove the areas at risk of flooding and areas benefiting from defences from the Key Diagram.
