

**DON'T FEAR**

**YOUR SMEAR**

**Are you aged between 25 and 64?**

Every woman and person with a cervix needs a regular cervical smear test

A smear test only takes a few minutes, but that time could save your life

You can have your smear test with your nurse, or GP. If you think you may have missed a test, or you are not sure when you had your last test, please contact your GP

It is important to keep up to date, so that any changes that could lead to cancer are detected and treated early
