## 1.0 Introduction

- 1.1 The Strategic Housing Land Availability Assessment (SHLAA) supports the delivery of sufficient land for housing to meet the need for new homes.
- 1.2 The Revised National Planning Policy Framework (February 2020) (NPPF), states that strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a SHLAA (para 67). The SHLAA identifies a future supply of land which is suitable, available and achievable for housing and when it is likely to be developed. The SHLAA is an important source of evidence to inform plan-making and decision-taking and also identifies a 5 year supply of housing land. It can also inform as well as make use of sites in the brownfield register.
- 1.3 Trafford Council prepares the SHLAA as part of the evidence base to inform the preparation of the Trafford Local Plan. Planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability. Planning policies should identify a supply of specific, deliverable sites for the years one to five of the plan period; and specific, developable sites or broad locations for growth for years 6-10 and, where possible, for years 11-15 of the plan (para 67). Further information on how a site is considered deliverable or developable is included in section 3 of this report.
- 1.4 This 2020 SHLAA presents an updated assessment of the housing land supply position within Trafford as at 31 March 2020.
- 1.5 The SHLAA does not in itself determine whether a site should be allocated for development. It is the role of the SHLAA to provide information on the range of sites which are available to meet the Council's requirements, but it is for the Local Plan itself to determine which of those sites are the most suitable to meet those requirements.
- 1.6 National Planning Practice Guidance sets out the method for assessing the SHLAA. For more information about this and Trafford specific methodology see section 3.
- 1.7 All sites will be subject to site specific development management considerations at the point of determining the planning application.

## 2.0 Planning policy context

### Trafford's Development Plan

- 2.1 The **Core Strategy** is the principal document within the Trafford Development Plan and sets the vision, spatial strategy and policies for development in Trafford up to 2026.
- 2.2 A number of other documents also form Trafford's Development Plan and should be read in conjunction with it:
  - the remaining "saved" Revised Trafford UDP policies and proposals (adopted June 2006);
  - the Greater Manchester Joint Waste Development Plan Document (adopted April 2012);
  - the Greater Manchester Joint Minerals Development Plan Document (adopted April 2013); and
  - the Altrincham Town Centre Neighbourhood Business Plan (adopted November 2017).

2.3 The Core Strategy is now deemed by the Revised NPPF to be out of date in relation to housing need targets. This is because the housing requirement is more than five years old. Further information about this is set out in section 6 – Meeting Trafford’s housing land target.

**Core Strategy: Strategic Locations**

2.4 The Core Strategy identifies five Strategic Locations as the key areas for change over the plan period (up to 2026), which includes significant residential development. These are:

- SL1 - Pomona Island;
- SL2 - Trafford Wharfside;
- SL3 - Lancashire County Cricket Club Quarter;
- SL4 - Trafford Centre Rectangle; and,
- SL5 - Carrington.

2.5 For each of the five Strategic Locations the associated Core Strategy policies set out an indicative minimum figure for residential development to be delivered over the Plan period. As work on the new Trafford Local Plan progresses, the latest development opportunities in these strategic locations have been considered.

2.6 The table below illustrates the contribution that these Strategic Locations currently make to the housing land supply following the March 2020 SHLAA review. Figures relating to the residential allowance have been adjusted in light of work on masterplans and Area Action Plans in these areas.

**Table 1: Strategic Locations development update – March 2020**

<b>Strategic Location</b>	<b>Land Supply (March 2020)</b>	<b>Original Core Strategy residential allowance</b>	<b>With planning permission (excludes completed)</b>	<b>Completed (Gross)</b>	<b>Completed (Net)</b>
SL1 - Pomona Island	3,456	800	742	164	164
SL2 – Trafford Wharfside	2,900	900	354	0	0
SL3 – Lancashire County Cricket Club Quarter (now Civic Quarter AAP)	2,800	400	331	7	7
SL4 - Trafford Centre Rectangle	3,000	1,050	3,000	0	0
SL5 – Carrington	1,203	1,560	603	7	6
<b>Total</b>	<b>13,359</b>	<b>4,710</b>	<b>5,030</b>	<b>178</b>	<b>177</b>

**Land Allocations Plan**

2.7 The Council consulted on a full draft of the Trafford Local Plan: Land Allocations (LAP) from 3 February 2014 to 17 March 2014. It proposed the allocation of sites for residential purposes above a site size threshold of 0.4 hectares; with smaller sites expected to come through the planning application process.

2.8 Work halted on the LAP pending the production of the Greater Manchester Spatial Framework (GMSF) and the new Trafford Local Plan.

### **New Trafford Local Plan**

- 2.9 The emerging new Trafford Local Plan will play an important part in the future growth of Trafford, alongside the emerging sub-regional Plan. The sub-regional plan will set out strategic planning policies, whilst the Local Plan will set out detailed planning policies and allocate sites for development, protection or for other purposes e.g. town centre boundaries or green networks. The Trafford Local Plan will ultimately replace the Core Strategy and saved Revised UDP policies, and will form part of the development plan for Trafford. Once adopted, it will form the basis for making decisions on planning applications.
- 2.10 The Council's Executive made the decision to prepare a new Local Plan for Trafford at the Executive meeting on the 25 June 2018. The Issues Paper consultation phase of the new Local Plan took place from 23 July to 14 September 2018. The next stage will be public consultation on the Draft Local Plan (Regulation 18) in February 2021.

### **Greater Manchester Spatial Framework**

- 2.11 The Greater Manchester Spatial Framework (GMSF) was a sub-regional plan for the city region, setting strategic policies and establishing housing requirements for each GM district. This SHLAA has been prepared in the context of the GMSF (2020) sub-regional plan.
- 2.12 Following the decision of Stockport Council in December 2020 to not approve the GMSF 2020 for Regulation 19 consultation or submission, the GMSF is no longer being progressed in its current form. The intention is to prepare an alternative sub-regional plan for the remaining Greater Manchester districts which will ultimately sit alongside the Trafford Local Plan as part of the overall Development Plan.
- 2.13 References to the GMSF 2020 have been retained within the SHLAA to illustrate the strategic framework that a sub-regional strategic plan may set and to give an indication of the anticipated growth in Trafford within a Greater Manchester context. This SHLAA presents the position as at 1 April 2020 when work on the GMSF 2020 was still progressing as originally intended.

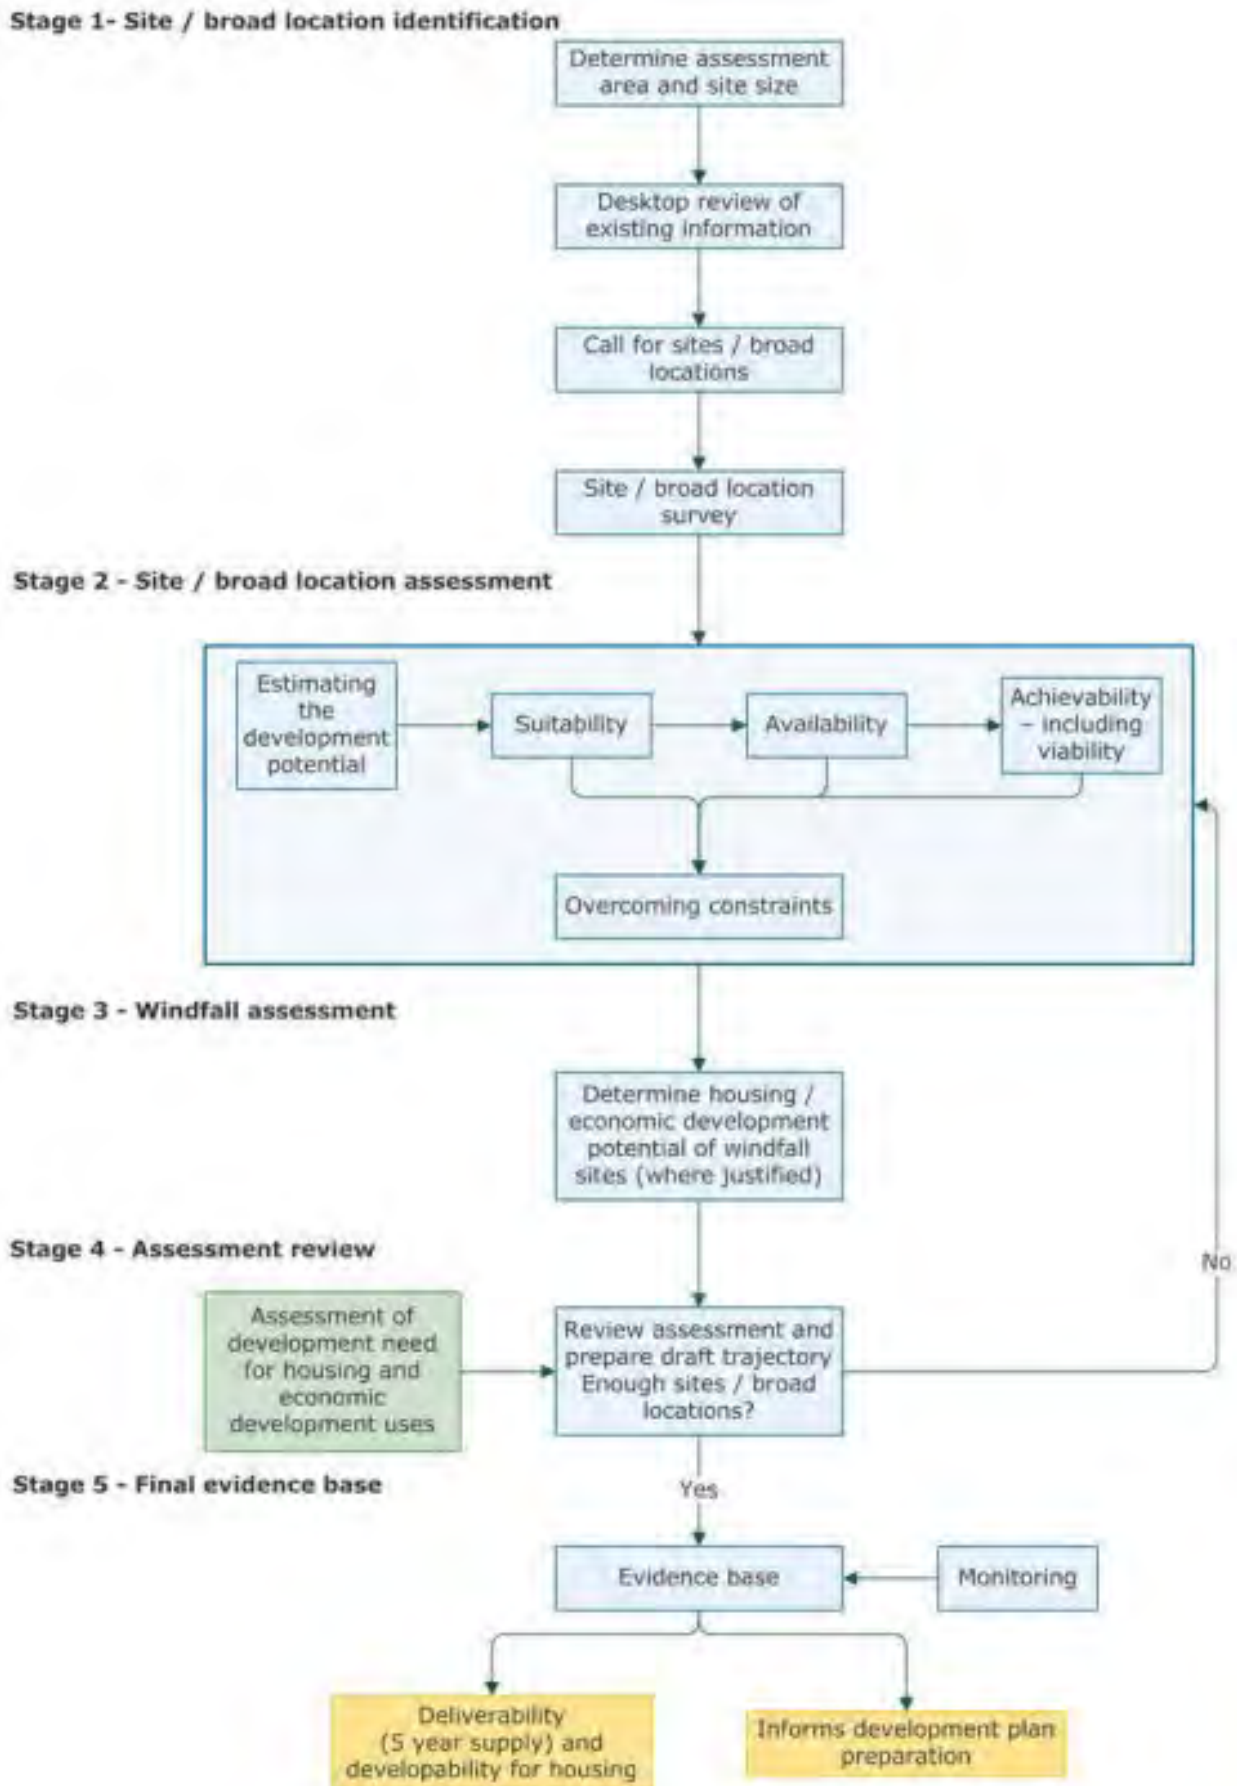

## **3.0 Methodology**

- 3.1 This SHLAA has been produced in line with the National Planning Policy Framework Planning Practice Guidance using the methodology as represented in the diagram shown in figure 1.

### **Sites within the SHLAA**

- 3.2 In broad terms the SHLAA should:
- Identify sites and broad locations with potential for development;
  - Assess their development potential;
  - Assess their suitability for development and the likelihood of development coming forward (the availability and achievability).
- 3.3 The SHLAA should identify a supply of specific, deliverable sites for years one to five of the plan period; and specific, developable sites or broad locations for growth, for years 6-10 and, where possible, for years 11-15 of the plan.
- 3.4 Smalls sites that come through the planning application process and which have not been identified in this SHLAA review will be identified in future reviews.

**Figure 1: Housing and economic land availability assessment methodology flowchart**

- 3.5 To be considered **deliverable** (0-5 years), sites for housing should be available now, offer a suitable location for development now and be achievable with a realistic prospect that housing will be delivered on the site within five years.
- 3.6 Deliverable sites include:
- All sites currently actively under construction
  - All sites with a valid full planning permission (unless there is clear evidence that homes will not be delivered within five years. For example, there may be evidence that a site is no longer viable, there is no longer a demand for the type of units a planning permission was granted for or sites have long term phasing plans associated with them).
  - Sites with outline permission for 9 units or less
  - Sites with outline permission for more than 9 units with clear evidence that housing completions will begin on site within five years where the site has been:
    - allocated in a development plan
    - granted permission in principle
    - identified on a brownfield land register
- 3.7 Specific, deliverable sites (0-5 years) include sites with reserved matters applications, prior approval, changes of use and applications that are “minded to grant” where there is an intention to sign.
- 3.8 In terms of the specific, **developable** sites or broad locations for growth (6-10 and 11-15 years), these sites should be in a suitable location for housing development with a reasonable prospect that they will be available and could be viably developed at the point envisaged.
- 3.9 For Trafford, the type of site included in years 6-10 and 11-15 include (this list is not exhaustive):
- Has outline planning permission for major development (i.e. 10 or more units) where no reserved matters has been received/approved or infrastructure improvements required to deliver the scheme are established;
  - Planning permission has expired for a site of 5 or more units. These include sites with full planning permission, outline planning permission, prior approval and change of use;
  - Planning permission has been implemented, but works have halted;
  - Developer interest in the site (including call for sites process);
  - Subject to masterplanning work e.g. Stretford Masterplan;
  - Identified within the Draft Land Allocations Plan;
  - Allocation within the Altrincham Town Centre Business Neighbourhood Plan;
  - Allocation within the UDP;
  - Identified for broad areas of growth (e.g. Strategic Locations within the Core Strategy);
  - Allocation within the Civic Quarter AAP;
  - Key sites within the Council’s Strategic Land Programme;
  - Phased larger sites with planning permission.

- 3.10 Sites within the SHLAA can be subject to change in terms of when they are expected to come forward. Sites can also subsequently be **discounted** from the SHLAA altogether and not all sites will be suitable for inclusion. Common reasons include:
- Development has been completed;
  - A planning permission on a smaller site (1-4 units) has expired;
  - An alternative use on the site e.g. employment use, no planning interest, well established use;
  - Not currently developable e.g. access issues, open space, development will not come forward in its current form; and
  - Duplication of existing sites.

### **Site constraints**

- 3.11 There are a number of constraints that are taken in to account when considering a site for inclusion in the SHLAA including:
- Existing use of the site and local character
  - Physical constraints (e.g. access, contamination, flood risk, infrastructure/utilities)
  - Proximity to services and infrastructure such as public transport.
  - Local Plan policies (eg Green Belt)
  - Environmental designations

### **Sustainability Appraisal assessment**

- 3.12 For each of the sites included in the SHLAA a rapid assessment of the suitability/sustainability of the site for housing has been carried out. The assessment of the SHLAA sites does not constitute a formal Sustainability Appraisal (SA) and the assessment process does not seek to meet the requirements of the Strategic Environmental Assessment Directive. Instead it is a high level assessment of the sustainability of the sites and an extended consideration of the suitability of these sites (as required by the NPPF and described by the Planning Practice Guidance).
- 3.13 The sites identified in the SHLAA performed particularly well against the criteria that relate to local services and facilities. The majority of the sites are also within the urban area, comprise of previously developed land, are at low risk of fluvial flooding and their development for housing is unlikely to have a significant impact on the setting or significance of any designated heritage assets.

### **Strategic Flood Risk Assessment**

- 3.14 The Level 2/Hybrid Strategic Flood Risk Assessment (SFRA) for Manchester, Salford and Trafford reviewed the potential for flooding from rivers, canals, the sewer network, surface water run-off and groundwater. The findings of this assessment were first published in May 2010, with a revised Level 2 SFRA report incorporating enhanced mapping published in March 2011. In August 2012 the Environment Agency (EA) published an updated Flood Map, which reflects the High Court judgement regarding the Manchester Ship Canal; this represents the best modelled information available, and has been used to assist in assessing the potential for development of the sites included in this 2020 SHLAA review.
- 3.15 Each site identified within this assessment has been subject to an initial flood risk assessment, to identify the percentage of the site which falls within Flood Zones (FZ) 1, 2 and 3. In addition to this, SA's have been undertaken on all of these sites. The majority of sites that fall within FZ3 have been discounted, along with many of the sites within FZ2, with the exception of the Strategic Locations and sites that have extant planning permission. The details of the design of schemes where part of the site falls within FZ3, FZ2 or is within a critical drainage area can be assessed through the site's planning history.

- 3.16 Flood Risk Assessments (FRAs) will be required at planning application stage for some of the sites identified within the SHLAA 2020 review, especially if they fall within FZ3, FZ2 or critical drainage areas, and it is acknowledged that they will vary in detail and technical complexity to reflect the scale, nature and location of the proposed development.

## **4.0 Review of large sites in the Housing Land Supply**

- 4.1 As set out in Section 2, the Trafford Core Strategy identifies five Strategic Locations, each of which will deliver a significant number of new homes. Since the adoption of the Core Strategy, work has continued and Masterplans / Area Action Plans have been developed for these areas, as well as other large sites. As a result of this work, and following a review of site densities in the urban area, there has been a significant increase in the number of units proposed in these locations.
- 4.2 In order to understand the likely contribution of the large sites to the land supply a set of assumptions have been established, attributing a lead in time, build out rate and potential date completions could be seen on each site. These assumptions relate to large sites in Trafford's identified housing land supply that do not currently have planning permission.

In 2016 the planning consultancy Lichfields produced a report that analysed build out rates and average start dates for the development of new homes on large sites. This report was referenced in various Local Plan examinations and used as an evidence base document to inform the production of Development Plans, appeal statements and planning inquiries. The report has been shared amongst the Greater Manchester Land Supply Group and has been agreed as a good basis from which to make assumptions on the expected land supply contribution of large sites. This report was updated in February 2020 and the findings in the report have been amended to reflect the latest averages across the UK. The updated report is called 'Start to finish: what factors affect the build-out rates of large scale housing sites?' (Lichfields, February 2020).

- 4.3 The assumptions present a position on an 'average' site, but it will also be the case that some sites will come forward much more quickly and some more slowly than this average. The following assumptions will be used where there is no other information to indicate a different lead in time or build out rate would be appropriate. Where information from masterplans or developers has been provided and is considered to be reasonable, then these will be used instead of broad assumptions.

### Lead in times

- 4.4 The lead in time refers to the amount of time it takes for the first completion on site. This could include the time it takes to submit and determine a planning application, or the time from the commissioning of a masterplan for a strategic site. The length of lead in time will vary depending on the type of site under consideration. When making an assumption for lead in time, consideration has been given to factors such as the status of any masterplanning, planning application progress or any other intelligence that is available. Greenfield sites will typically come forward more quickly than brownfield sites because land condition and remediation requirements are different.
- 4.5 The Lichfields (Feb, 2020) report provides the following average lead in times by site capacity:

No. Units	Average no. years for approval
0-99	1.4
100-499	2.1
500-999	3.3
1000-1499	4.6
1500-1999	5.3
2000+	6.1

- 4.6 It is worth noting that large sites can only be considered as likely to deliver completions in the first five years if they meet the requirements of the NPPF definition of ‘Deliverable’ (see section 3 of this report). Large sites that are shown to deliver units in the first five years are those which have existing residential planning approvals on parts of them. These may not cover the whole of the site and will therefore come forward incrementally.

#### Build out rate

- 4.7 This is the number of units delivered on a site per year. Build out rate is impacted by site size, the number of development parcels and the number of outlets as part of any development. As the number of development parcels and outlets cannot be effectively determined until the planning permission process is advanced, broad assumptions have been applied.
- 4.8 The build out rate is also impacted by the level of affordable housing provision on site. However it has been assumed that all sites will be meeting the same affordable housing requirements in line with adopted Trafford policy until evidence indicates otherwise.
- 4.9 Development that has public sector involvement in infrastructure provision will come forward more quickly. Therefore where sites are part of a Council led initiative, the expected dwellings per annum delivery rate has been increased to reflect this.
- 4.10 The Lichfields report provides the following average build out rates by site capacity which have been used in making assumptions on likely additions to the land supply. The maximum suggested build out rate for a site of 2000+ units is 160 per year however this has been increased on sites subject to Council led masterplanning or Area Actions Plans in line with recommendations made in the Lichfields report (2020):

No. Units	Dwellings per Annum
0-99	22
100-499	55
500-999	68
1000-1499	107
1500-1999	120
2000+	160

- 4.11 Information received through the emerging masterplanning work for the GMSF 2020 demonstrated that developers do not consider that any one outlet can be assumed to deliver more than 35 units per year for a typical suburban scheme to be considered deliverable. Therefore applying delivery rates of any more than this per year to a site is demonstrating that more than one outlet is anticipated. It is worth noting that the Lichfields Report is largely based on typical suburban sites and therefore it could reasonably be argued that the rate could be increased for higher density schemes in more urban locations.

## 5.0 Summary of the 2020 SHLAA review results

5.1 The results of the 2020 review of the potential future supply of housing land, over time and by geographical area, are set out in this section.

### Potential supply from sites

5.2 Table 2 provides a breakdown of the potential number of units expected to come forward from identified sites.

5.3 Sites outside of the planning process are those that are neither identified in the Development Plan nor the subject of extant planning permission for 5 units or more. None of the sites outside of the planning process fall within the criteria for sites that can be identified in Years 0-5.

5.4 The potential supply is evenly spread across the time bands. A significant proportion of the supply in the 0-5 year and 5-10 year time bands comes from draft Local Plan allocations, sites currently under construction and existing unimplemented planning permissions. The list of sites included within table 2 is set out in Appendix 1.

5.5 It should be noted that sites identified within the first draft Land Allocations Plan and sites submitted as part of the new Local Plan process (Regulation 18 Issues Paper consultation) which are suitable for housing and are sustainable sites have been included within the identified land supply as they fall within the NPPF definition of developable sites. These are categorized as “Draft Local Plan allocations”.

**Table 2: Summary of potential from identified sites**

Source of supply	<5 Yrs 2020/21- 2024/25	5-10 Yrs 2025/26- 2029/30	10-15 Yrs 2030/31- 2034/35	15+ Yrs 2035/36 +	Overall total
Existing UDP allocations	150	0	0	0	<b>150</b>
Draft Local Plan allocations	0	2,272	2,516	3,035	<b>7,823</b>
Sites with outstanding planning permission	1,029	1,682	1,187	1,400	<b>5,298</b>
No. units remaining on sites under construction	2,691	610	0	0	<b>3,301</b>
No. units on sites outside planning process	0	1,771	338	0	2,091
<b>Total supply identified in SHLAA</b>	<b>3,870</b>	<b>6,335</b>	<b>4,041</b>	<b>4,435</b>	<b>18,681</b>

### Previously Developed Land

5.6 Core Strategy Policy L1 ‘Land for new homes’ sets a target of 80% of all new residential development to be provided on previously developed land. Table 3 provides a breakdown of the potential supply from identified sites in the SHLAA by source of supply and time band. The table indicates that 75% of new homes will be derived from the use of previously developed land.

**Table 3: Summary of potential from all sites**

Source of supply	<5 Yrs 2020/21- 2024/25	5-10 Yrs 2025/26- 2029/30	10-15 Yrs 2030/31- 2034/35	15+ Yrs 2035/36 +	Overall total
Greenfield	31	1,200	1,010	1,400	<b>3,641 (19%)</b>
Greenfield garden	9	0	0	0	<b>9 (0%)</b>
Mixed greenfield/Brownfield	500	323	0	0	<b>823 (6%)</b>
PDL – occupied	2,489	3,301	1,775	1,735	<b>9,300 (49%)</b>
PDL/Vacant/Derelict	841	1,511	1,256	1,300	<b>4,908 (26%)</b>
<b>Total supply</b>	<b>3,870</b>	<b>6,335</b>	<b>4,041</b>	<b>4,435</b>	<b>18,681</b>

**Potential sources of supply by site size**

- 5.7 Table 4 provides a breakdown of the total potential supply by site size. This table indicates that the largest source of supply (75%) will come from a relatively small number of large sites (sites of 2.5 hectares or more in size).
- 5.8 Sites of 0.4 hectares or less will potentially contribute 8% of the supply. Sites of 0.4 to 0.79 hectares will potentially contribute 6% and sites of 0.8 to 2.5 hectares will potentially contribute 11% of the supply.

**Table 4: Potential sources of supply by site size**

Site size (Ha)	<0.4	0.4 - 0.79	0.8 - 2.5	>2.5	Overall total
No of units in the planning process	1,246	1,159	1,645	12,522	<b>16,572 (89%)</b>
No of units outside of the planning process	315	20	352	1,422	<b>2,109 (11%)</b>
<b>Total supply</b>	<b>1,561 (8%)</b>	<b>1,179 (6%)</b>	<b>1,997 (11%)</b>	<b>13,944 (75%)</b>	<b>18,681</b>

**Density assumptions**

- 5.9 The NPPF advises that plans should contain policies to optimise the use of land in their area and meet as much of the identified need for housing as possible. Historically, the SHLAA made assumptions about anticipated densities for sites identified without planning permission based on housing commitment data for sites of 10 or more units.
- 5.10 More recently, the draft GMSF (2020) policy for the density of new housing proposed that new housing development should be delivered at a density appropriate to the location, reflecting the relative accessibility of the site by walking, cycling and public transport. The minimum densities in the GMSF (2020) (as set out in appendix XX) have been applied to sites in the SHLAA.
- 5.11 The specific capacity of each site will be established through the development management process, taking into consideration a number of factors including amenity and traffic issues.

**Sites with communal facilities**

- 5.12 Sites with communal facilities, for example residential care homes for the elderly, a national ratio is applied of 1.8. For example, a 40 bedroom care home would equate to 22 units within the SHLAA (i.e.  $40 \div 1.8 = 22$ ).

**Larger sites in the SHLAA**

- 5.13 Phased larger sites can deliver completions over a number of time bands. Information relating to this is covered in section 4 of this report.

**6.0 Meeting Trafford's housing land target**

- 6.1 The Core Strategy is now considered to be out of date in relation to housing need targets as the housing requirement set out is more than five years old.
- 6.2 The housing requirement established in the Core Strategy of 12,210 new dwellings up to 2026 reflected the ambition of the Council to play its full part in the delivery of new residential accommodation to support the economic regeneration and growth aspirations of the Manchester City Region at the time. The commitment to provide a 20% uplift to the Regional Spatial Strategy housing development target translated to an increase of Trafford's housing requirement to 694 units per annum up to 2018.
- 6.3 As the Core Strategy is 'out of date' its housing land targets have been replaced by the new Local Housing Need (LHN) requirement for homes. In Trafford as at 31 March 2020 this is 1,369 units per annum (net). This LHN requirement will remain in place until such time that a strategic plan for Greater Manchester and/or the new Trafford Local Plan is adopted setting a housing requirement and housing delivery trajectory for Trafford.
- 6.4 Previous annual housing completions since 2008/09 (the start of the Core Strategy Plan period), are shown in Table 5. There has been a significant shortfall in the delivery of new homes against the borough's Core Strategy and subsequently the LHN requirements.

**Table 5: Actual new housing provision 2008/9 to 2019/20**

Year	No. comps (gross)	No. comps (net)	Core Strategy requirement	Shortfall
2008/9	427	344	578	234
2009/10	355	283	578	295
2010/11	317	256	694	438
2011/12	256	200	694	494
2012/13	232	32	694	662
2013/14	247	145	694	549
2014/15	245	215	694	479

			<b>LHN requirement (Calculated 1<sup>st</sup> April)</b>	<b>Shortfall</b>
2018/19	1,001	953	1,335	382
2019/20	788	689	1,362	673

- 6.5 Please note there is no annual trajectory following the implementation of the LHN target, this will be determined through the new Trafford Local Plan when adopted.

## 7.0 Trafford's five year housing land supply position – as at 1 April 2020

- 7.1 In accordance with the Revised NPPF, Local Planning Authorities (LPAs) are required to significantly boost the supply of housing through the identification of a deliverable five year housing land supply (1 April 2020 – 31 March 2025).
- 7.2 To be considered deliverable, sites for housing should be available now, offer a suitable location for development now and be achievable with a realistic prospect that housing will be delivered on the site within five years. Further information on how sites are considered to be deliverable is contained within section 3 of this SHLAA.
- 7.3 The Council should identify and update annually a supply of specific deliverable sites sufficient to provide a minimum of five years' worth of housing land. This target is calculated against the housing requirement set out in adopted strategic policies or against the Local Housing Need (LHN) where the strategic policies are more than five years old as set out in section 6 of this SHLAA.
- 7.4 In plan-making, strategic policies should identify a five year housing land supply for the intended date of adoption of the Plan. For decision-making purposes, a LPA will need to be able to demonstrate a five year housing land supply as part of the applications and appeals process. This can be done in one of two ways. Using the latest available evidence such as the SHLAA or 'confirming' the five year supply using a recently adopted Plan, or through a subsequent annual position statement.
- 7.5 Trafford's five year housing land supply is calculated against LHN (as at 1 April 2020) using the standard method set out in national planning guidance, as the housing requirement set out in the Core Strategy (adopted January 2012) is more than five years old. The LHN is calculated by taking national household growth projections (the latest used as advised by national government are the 2014 position), applying an adjustment to take in to account affordability for Trafford and the number as a result of this is then capped, determined by the current status of the Development Plan (i.e. more than five years old for Trafford). Following this methodology the annual housing requirement for Trafford as at 1 April 2020 is 1,369 units per year.
- 7.6 To improve the prospect of achieving the annual target for housing completions, there should be a buffer on the identified supply of specific deliverable sites to provide flexibility in which sites could come forward. There has been an under delivery of housing completions over the previous three years. This underperformance is measured against the Housing Delivery Test<sup>1</sup>, where the 2019 measurement indicated that the delivery was below 85% of the housing requirement in Trafford. Underperformance at this scale means that Trafford Council is required to identify enough sites to meet the five year requirement plus an additional buffer of 20% which gives a new **annual housing requirement of 1,642.8 units a year.**
- 7.7 As at 1 April 2020 there were 3,870 units considered deliverable over the five year period 2020/21 to 2024/2025, which is equivalent to 774 units per year, giving Trafford a deliverable supply of 2.4 years. This means that the Council cannot demonstrate a five year supply of deliverable housing sites.

<sup>1</sup> <https://www.gov.uk/government/collections/housing-delivery-test>

**Table 6: Calculating Trafford Five Year Land Supply position**

LHN Target per year	1,369 <sup>2</sup>
LHN Target per year + 20% buffer	1,642.8
LHN Target 2020-2025 + 20% buffer	8,214
Deliverable housing land supply 2020-2025	3,870
Number of years supply calculation (3,870 ÷ 1,642.8)	2.4 years

## 8.0 Review of the assessment

- 8.1 This report provides the findings of the 2020 review of the Trafford SHLAA.
- 8.2 The SHLAA will continue to be reviewed and updated on an annual basis in consultation with stakeholders as part of the Authorities Monitoring Report preparation and reporting process.
- 8.3 Should third parties be aware of additional sites that should be considered for inclusion within the next review of the SHLAA, site details should be provided to the Strategic Planning and Growth Team via email at [strategic.planning@trafford.gov.uk](mailto:strategic.planning@trafford.gov.uk) or via post to Strategic Planning and Growth Team, Trafford Town Hall, Talbot Road, M32 0TH.

<sup>2</sup> LHN Target per year is based on housing affordability in England and Wales: 2019 - released 19 March 2020
