Appendix E- List of data sources

1. Background

This study provides updated information on Trafford's outdoor sports facilities and pitches to the study carried out and published in 2001. The format of the report is different from the 2001 study. This study looks at an audit of public and private facilities and their distribution in the borough. It also includes an assessment of quality of the public facilities as recommended in Planning Policy Guidance Note 17 (PGg17) .The PPG 17 guidance was used to carryout an audit of Trafford's Green and Open Spaces in June 2005. This study should be read in conjunction with the 2005 study which provides details on wider issues with green space and views of the community in terms of quality and future needs of the community. Sports Groups were a major contributor to the consultation carried out in the 2005 study. A review of indoor sports facilities is the subject of a separate Leisure Review report.

2. Introduction

The aim of this study is to provide an up to date audit of outdoor sports facilities and pitches, concentrating on publicly accessible sites. This audit covers 136 site locations and assesses the quality of facilities of Trafford's significant outdoor sports activities. The study looks at the distribution of the facilities and identifies areas where there may be poor access to particular outdoor sports facilities. Both quantity and quality need to be considered in assessing adequacy of provision. The audit covers the following pitch types:

- All Weather
- Athletics
- Basketball
- Bowls
- Cricket
- Football
- Gaelic
- MUGA's (Multi Use Games Areas)
- Rugby
- Tennis

This was a desk based project, collating current data to be reviewed and rated by experienced staff in Trafford Sports Development and the Parks and Countryside Service. The data was stored in an Access database and analysed and mapped using MapInfo. Appendix A contains a list of all the site locations, while Appendix B contains a list of all the pitches.

3. Methodology

Quality assessment of public facilities and pitches

The national standard for carry out such audits is the Sport England Pitch Quality Assessment tool which forms part of their Towards a Level Playing Field electronic toolkit. The tool provides a standard approach to assessing the quality of individual pitches and is a non-technical visual quality assessment, undertaken by a surveyor walking a site. There are three forms to complete as part of an Excel spreadsheet which automatically calculates the overall ratings for a site's facilities and each pitch (Appendix C).

With the resources available this methodology was adapted but is still considered a sound methodology delivering robust results. The pitch assessment criteria were condensed into four simplified categories and used to rate all pitches of a particular sport using three levels of rating, Good, Adequate and Poor (Table 1).

| Category | Elements from Sport England Pitch Assessment (additions in bold) | Weighting |
|--------------------|--|-----------|
| Pitch Condition | Grass cover - entire pitch / cricket field Length of grass Slope of pitch / cricket outfield (gradient and cross fall) Evenness of pitch / cricket field Problem Areas: Evidence of Dog fouling Problem Areas: Evidence of Glass/ stones/ litter Problem Areas: Evidence of Damage to surface Hard surface breaking up or badly worn | 50% |
| Pitch Markings | Line markings – quality | 10% |

| Equipment | Winter Sports Only – Goal Posts – quality Tennis – quality of nets and enclosure Cricket – Screens and wicket cover | 5% |
|-----------|---|-----|
| Overall | Size of pitch / cricket field Adequate safety margins Problem Areas: Evidence of Unofficial use Training: Estimated number of hours per week in season Training area Games cancelled due to unfitness of pitch (excluding frozen pitches) | 35% |

Table 1 – Simplification of Sport England's Individual Pitch Assessment into four categories.

An example assessment form was created based on an amalgamation of the Sport England site assessment form and the categories of Table 1 and shows the score assigned to each rating (Appendix D). Based on the number of points allocated in the Sport England spreadsheet for each pitch assessment criteria the categories were weighted to give an overall percentage score (table 1). This was used for all the sports except bowls which was assessed on the pitch condition and overall categories. The resulting scores (percentages) were then colour coded based on a traffic light system, in a similar way to the Greenspace 2005 study, where green is for sites which are good, amber for sites which are adequate and red for sites which are poor. Different cut offs were used for the quality scores of facilities and pitches due to the variation in the scores generated by the ratings (table 2).

| Category | Facility Score | Pitch Score | Colour |
|----------|----------------|-------------|--------|
| Poor | <40 | < 35 | Red |
| Adequate | 40 - 59 | 35 - 79 | Amber |
| Good | >60 | >80 | Green |

Table 2 – Conversion of quality scores to traffic light colouring.

Assessment of sports pitch supply and demand

In October 2003 Sport England introduced its Playing Pitch Model to provide a consistent approach to the strategic planning of outdoor sports provision in terms of supply and demand. The model consists of an eight stage process as follows:

- 1. Identifying teams
- 2. Calculating home games per week
- Assessing total home games per week
- 4. Establishing temporal demand for games
- 5. Defining pitches required each day
- 6. Establishing pitches available
- 7. Assessing the findings
- 8. Identifying policy options and solutions

To carry out this type of analysis requires a significant amount of data from sports groups which currently is not held and would be time consuming to collect for this study. Also, some form of user survey would be required to calculate the usage of pitches where there is informal access, e.g. tennis courts, MUGA's and basketball courts in parks. In addition, it was felt that at this time the quality and distribution of facilities and pitches was of a higher priority and that supply was currently satisfactory. In future, the annual survey of sports groups could be tailored to collect the required data so the Sport England Playing Pitch Model could be implemented.

Assessment of public sports pitch distribution by buffering walking distance.

This was carried out by drawing a circle, known as buffering, around each public pitch for each sport. The buffer distances were set at

- 600m to represent a 10 minute walk,
- 1,200m to respresent a 20minute walk
- 1,800m to represent a 30 minute walk

This method is limited in its ability to accurately count the number of residents within a certain distance of a site due to the road network pattern, physical barriers, variations in walking speeds and the location of access points to a site. However, it does allow a quick visual interpretation, highlighting areas which are deficient if they are not covered by the buffers. In terms of car travel, 1,800m would approximate to a 5 to 10 minute drive and it was felt that many people use their cars for accessing sports facilities. This is particularly the case for competitive sports where away fixtures would be played and would require longer travelling distances.

Outdoor sports facilities database

The data for this study was collated from a number of paper sources along with discussions with staff in Trafford Sports Development and the Parks and Countryside Service (Appendix E). An Access database was created containing two tables, sites and pitches. The sites table contains details of the address and facilities of a site, and the pitches table contains the number of pitches by sport at each site. Therefore, the relationship between the two tables is one site can have one or more types of sports pitches. Sports pitches were assessed as a whole rather than individually, so if all pitches were not of a similar quality then a comment was made in the pitch comment and a lower rating given. Each site and pitch location was given an X-Y coordinate to allow them to be plotted in MapInfo.

A form was created within the Access database to allow the sites and pitches to be rated as per the example form in Appendix D. This exercise was carried out by Trafford Sports Development and Parks & Countryside Service.

4. Quality Evaluation of Facilities and Pitches

Facilities

The database contains 136 site locations of which 68 are public. The 68 public sites are split between 32 sites with changing facilities (47%) and 36 without (53%). Of those without changing, if those sites where changing facilities are not essential or where access is informal are removed (Tennis,

MUGA'S, Basketball and Bowls), then 11 sites remain (Table 3). Athletics (3 sites), Cricket (2) and Gaelic (1) all have changing facilities.

Quality of Changing Facilities

Of the 32 sites with changing facilities, based on their overall rating, they breakdown as follows: 13 Good, 14 Adequate and 5 Poor (table 4 & figure 1). Of the 13 sites rated as good they are evenly distributed across the borough. Those with a lower score are the result of no segregated changing and problems with vandalism and security.

| Site ID | Site Name | Sport | Comments |
|------------|--------------------------------------|------------------|---|
| 41 | Woodheys School | All Weather | |
| 44 | Altrincham Grammar School for Girls | All Weather | |
| 69 | South Trafford College | All Weather | |
| 10 | Cecil Avenue | Football | |
| 12 | Cherry Manor School | Football | School closing |
| 21 | Highfield Close | Football | |
| 24 | Manor High | Football | |
| 27 | Nansen Park | Football | |
| 29 | Oldfield Brow | Football | |
| 30 | Salisbury Road | Football | Football Club operate their own private changing room |
| 50 | Clarendon Crescent Recreation Ground | Football & Rugby | |

Table 3 – Sites without changing facilities excluding tennis, MUGA's, basketball and bowls.

Facilities rated as adequate are distributed across Trafford and could be improved to good if the following issues were addressed:

- Flixton Fields, Flixton Park, Seymour Park all have low ratings for their showers.
- Navigation Recreation Ground and Urmston Grammar School are just below the good category due to problems with vandalism and having adequate showers & toilets.
- Sylvan Avenue, Hale Croft Park, Grove Park all have a problem with parking.

5 facilities are rated as poor, with 3 concentrated in Urmston and the remaining 2 located in Timperley and Altrincham. Lees Field is bottom having been scored poor for every category and requires serious investment if its overall rating is to be improved. Second from bottom is Broadway which is let down by problems with vandalism, which if solved would put it into the adequate category. Chassen Road, Stamford Park and Timperley Recreation Ground require improvements to their shower and toilet facilities to give them an adequate score.

| Site Name | Site ID | Overall Quality | Vandalism | Showers | Toilets | Parking | Public Transport | Security | Segregation | Overall Rating * |
|-------------------------------------|---------|-----------------|-----------|---------|---------|---------|------------------|----------|-------------|------------------|
| Longford Park | 66 | 9 | 5 | 5 | 5 | 3 | 5 | 5 | 3 | 100 |
| Altrincham Grammar School | | | | | | | | | | |
| for Boys | 1 | 9 | 5 | 5 | 5 | 3 | 5 | 5 | 0 | 93 |
| Blessed Thomas Holford | | | | | | | | | | |
| School | 6 | 9 | 5 | 5 | 5 | 0 | 2 | 5 | 3 | 85 |
| Crossford Bridge | 15 | 6 | 2 | 5 | 5 | 3 | 5 | 5 | 3 | 85 |
| Banky Lane | 3 | 9 | 2 | 5 | 5 | 3 | 0 | 2 | 3 | 73 |
| Broadoak High | 7 | 9 | 2 | 5 | 5 | 3 | 0 | 2 | 3 | 73 |
| Barton Clough | 4 | 6 | 2 | 5 | 5 | 3 | 2 | 2 | 3 | 70 |
| Wellacre High School | | 6 | 2 | 3 | 3 | 3 | 2 | 5 | 3 | 68 |
| St Brides | 32 | 6 | 2 | 3 | 5 | 2 | 2 | 5 | 0 | 63 |
| Woodsend Park | 42 | 6 | 2 | 5 | 5 | 3 | 2 | 2 | 0 | 63 |

5 Issues from Quality Assessment

Vandalism

Of the 32 sites only four do not have a problem with vandalism. This problem is worst at Broadway and Lees Field where there is considered to be a lot.

Changing Facilities

- Off the 43 sites where changing facilities are considered to be necessary 11 (25%) have no facilities
- 8 Sites have poor showers which in addition to the previously mentioned sites also includes Weathercock Farm.
- Only 7 sites have segregated changing (22%) and are well spread across the borough (figure 2). These sites overall are rated as good. Of the six good sites without segregated changing, two are single sex schools: Altrincham Grammar School for Boys and Flixton Girls High School.

Figure 2. Public Outdoor Sports Facilities - Segregated Changing Facilities.

6. Quantity and quality Audit by Sport Type

All Weather

There are 10 public all weather sites split between 8 Senior and 2 Junior pitches, all of a good quality. There are 4 private sites with a total of 5 Senior pitches felt to be of a good quality, including Manchester United's Training Ground which allows some limited community access. Areas which do not have an all weather pitch nearby include: Stretford, the north and west of Sale, the west of Timperley near the border with Manchester and Hale Barns.

| | Sites | No of Pitches |
|---------|-------|---------------|
| Public | 10 | 10 |
| Private | 4 | 5 |

Table 5. Split Between Public and Private All Weather Sites

| Pitch ID | Site Name | Senior | Junior | Overall Rating |
|-------------|-------------------------------------|--------|--------|----------------|
| 68 | Altrincham Grammar School for Boys | 1 | | 100 |
| 70 | Flixton Girls High School | 1 | | 100 |
| 80 | Broadoak High | 1 | | 100 |
| 222 | Blessed Thomas Holford School | 1 | | 100 |
| 74 | Woodheys School | | 1 | 98 |
| 72 | Urmston Grammar School | 1 | | 97 |
| 73 | Wellacre High School | 1 | | 97 |
| 76 | South Trafford College | 1 | | 97 |
| 71 | Seymour Park | | 1 | 95 |
| 75 | Altrincham Grammar School for Girls | 1 | | 87 |

Table 6. Public all weather sites ordered by their overall rating.

Issues

 There is no problem with the quality of these facilities. The provision of new facilities in areas that are over 1,800 m away from existing facilities would improve local access, for example in Hale, Sale East and Stretford.

1,200m Buffer of Public Pitches 1,800m Buffer of Public Pitches

Athletics

There are three athletics facilities in the borough, all publicly accessible. Longford Park is home to Trafford Athletics Club and located on the boundary with Manchester. It it of a high quality, meets the standards of a regional facility and is being used regularly for competitions.. Timperley Recreation Ground is located close to the boundary with Manchester.and Crossford Bridge is located at the far north of Sale in the greenbelt of the Mersey Valley. Both these sites are training facilities for athletics but also heavily used by an increasing variety of other sports. Crossford Bridge although home to Sale Harriers is used by over a 1000 users at the weekend. Consequently these facilities at the 1,200 & 1,800m buffer level cover large areas not populated by Trafford residents and large areas of the population are a distance from these facilities, such as Urmston and Partington. With the high quality facilities providing for a diversity of sports and the close proximity of Crossford Bridge to the motorway it is likely many users are travelling from outside Trafford. However, for a borough the size of Trafford to have three athletics facilities is considered to be excellent, therefore, the development of new facilities to provide for areas not covered is unlikely. Longford Park is rated as good, whereas Crossford Bridge and Timperley Recreation Ground are adequate. Although all have been provided with floodlighting in the last few years there are still some improvements needed.

| | Sites | No of Tracks |
|---------|-------|--------------|
| Public | 3 | 3 |
| Private | 0 | 0 |

Table 7. Split Between Public and Private Athletics Sites

| Pitch ID | Site Name | Overall Rating |
|-------------|-----------------------------|-------------------|
| 84 | Longford Park | 100 |
| 83 | Crossford Bridge | 67 |
| 85 | Timperley Recreation Ground | 67 |

Table 8. Public athletics sites ordered by their overall rating.

Issues

- There is a need to improve facilities at Crossford Bridge and Timperley Recreation Ground.
- The increasing use of these sites for other sports is putting pressure on the capacity of the sites infrastructure for example car parking.

Basketball

There are 14 public basketball locations which are well distributed. At the 1,800m buffer distance the areas not covered included the west part of Sale, Bowden, the east part of Hale and Hale Barns. 4 Sites are rated as good and are spread out across Trafford, however, Sale and Hale Barns are some distance from these sites.

| | Sites | No of Courts |
|---------|-------|--------------|
| Public | 14 | 15 |
| Private | 0 | 0 |

Bowls

There are 28 locations of public bowling greens and 38 private. Details about the quality of the public sites is incomplete, however, those that have been independently rated as part of the Parks and Countryside Service's greenspace assessment are rated as good. A quality audit of pavilions has yet to be completed. The public sites are well distributed and at the 1,800m buffer level most of the borough is covered except for Hale Barns and small parts of Urmston, Bowden and Timperley.

600m Buffer of Public Pitches

1,200m Buffer of Public Pitches

1,800m Buffer of Public Pitches

Cricket

There are 2 public pitches of adequate quality and 12 private clubs and facilities. The public sites are located at the far north of Sale at Crossford Bridge and the far north east of the borough at St Brides, Old Trafford. Consequently these facilities at the 1,200 & 1,800m buffer level cover large areas not populated by Trafford residents resulting in the majority of the borough not being covered. Private facilities are of a higher quality and offer some solution to the poor distribution of public sites. Development work to encourage junior participation in cricket is ongoing and a good relationship exists between the private clubs for school and community use. However, the west part of Sale and Partington have no facilities available.

| | Sites | No of Pitches |
|---------|-------|---------------|
| Public | 2 | 2 |
| Private | 12 | 14 |

Table 13. Split Between Public and Private Cricket Sites

| Pitch ID | Site Name | Overall Rating |
|----------|------------------|----------------|
| 56 | Crossford Bridge | 67 |
| 223 | St Brides | 67 |

Table 14. Public cricket sites ordered by their overall rating.

Issues

- There is a need to improve current facilities. If there is demand, look to increasing the number of facilities available.
- Provision within schools could encourage junior participation in areas without access to private club facilities.

Football

There are 35 public sites and 8 private sites. The distribution of sites is excellent, with only the south part of Bowdon not covered by a public pitch at the 1,800m buffer level. 6 sites are rated as good; St Brides in Old Trafford, Chassen Road in Urmston and four sites concentrated in Sale; Crossford Bridge, Weathercock Farm, Manor Avenue and Cherry Manor School. Unfortunately, the pitches at Cherry Manor School will be lost once the school closes for redevelopment. Pitches rated as adequate are evenly distributed across the borough, however, there is a concentration of poor pitches in the Altrincham and Hale area where there are no good pitches.

The number of junior teams has increased from around 200 to 700 over the last few years and there are 28 registered clubs including 6 girls clubs. This has resulted in more pressure on the use of pitches and consequently their maintenance. More school pitches are being used that are often poorly drained and quality issues are likely to increase in the future.

Issues

- This is excellent coverage across the Borough but an additional facility
 in the south west of the borough around Bowdon would improve local
 access. However in terms of quality 5 sites are in need of improving
 three of which are in the far south of the borough.
- If the trend of increasing popularity within junior teams continues there
 maybe an issue of not enough pitches and more community use of
 school pitches needed.

| | Sites | No of Pitches |

Gaelic

There are three pitches rated as adequate at Turn Moss. It's location near the boundary with Manchester and in the green belt of the Mersey Valley means there are few Trafford residents within its immediate area.

MUGA's

There are 15 locations of public MUGA's in Trafford with 8 rated as good, of which five are concentrated in the Stretford and Old Trafford areas to the north of the borough. Only two locations are rated as poor; Baguley Lane and Broomwood Play Area. Urmston is poorly catered for with one site of adequate quality which is insufficient to cover the whole of this area. To the south of the borough, Bowdon, Hale, Hale Barns and the South of Altrincham all lack access to MUGA's at the 1,800m buffer distance.

Table 20. Public MUGA's ordered by their overall rating.

Issues

There is a deficiency of facilities in the south of the borough and only 1
facility covering Urmston and Flixton. New facilities in these areas
would increase coverage. 2 sites are of poor quality and in need of
improvement.

1,200m Buffer of Public Pitches

Rugby

There are two public rugby pitches at Clarendon Crescent Recreation Ground with a quality rating of adequate. Consequently the rest of the borough has to rely on private pitches. There are six locations of private pitches; Montell Carrington RUFC, Bowdon RUFC who play in Timperley, Altrincham Kersal RFC in Timperley and three sites in Sale; Ashton on Mersey RUFC, Trafford MV RUFC and Sale RUFC. Concentration of sites in the middle of the borough means the following areas have no local rugby facility: Old Trafford, Stretford, Urmston, Partington, Altrincham, Hale and Bowdon.

There is an increase in the number of clubs with 7 now running junior teams. However at present there is sufficient capacity at the existing sites to provide for this.

| 48 | Clarendon Crescent Rec. | 2 | 67 |

Table 22. Overall rating of the public rugby site.

Issues

 Distribution is poor but there may not be the demand for extra facilities. Private rugby may meet current demand at present but if popularity continues this may need to be reviewed in the future.

Tennis

The public tennis sites are well distributed with the exception of Partington and Old Trafford which does not have any courts. Those other areas of the borough not covered by public tennis at the 1,800m buffer level are covered by private facilities. This sport is well catered for by the private sector who manage over half of the Boroughs tennis facilities with 13 registered clubs.

Of the private facilities 72% of the courts are felt to be of a good quality. Only one public site is rated as good and three sites with low adequate scores due to the quality of equipment. 6 Sites with 18 courts (41% of public courts) are rated overall as 0, with Broadway described as unplayable and dangerous. The KKP study of 2001 mentioned 11 courts being unplayable due to their poor condition or lack of netting. Therefore there has been a deterioration in quality in recent years.

Issues

There is a fairly good distribution of facilities but there are some very poor locations which need investment. There is a lack of any public provision in Old Trafford and Partington. It is also in these regeneration areas where public provision is most important in encouraging participation.

Without significant investment the future of public tennis facilities in Trafford are under threat. The distribution of facilities may need to be reconsidered in order to make facilities sustainable. Investment in a Tennis Strategy and Tennis Development officer may be a way of taking this forward.

Table 24. Public tennis sites ordered by their overall rating.

Conclusions

Generally outdoor sports facilities are well distributed across Trafford with particularly high quality facilities for athletics and football in the north of the borough.

There are fewer public facilities for bowls, basketball, tennis, rugby and football in the south of the borough particularly Hale, Hale Barns and Bowdon.

Facilities in Partington, Sale West and some areas in the south of the borough are generally of a lower quality.

The main issues affecting the quality of facilities are high levels of vandalism on many sites particularly tennis.

In terms of facilities that are needed and not adequately catered for changing facilities are needed on many sites. This could be further clarified by the need particularly for segregated changing to cater for the growth in girls football.

Provision for public tennis facilities is particularly poor and a more strategic approach to improvements is needed in terms of participation and distribution of facilities to meet future needs.

To improve the quality of changing facilities improvements to shower facilities are identified on several sites.

Appendix C - Sport England pitch quality assessment tool

1) Site details form

2) Changing accommodation form

%0 %0 %0 %0 Score 0 0 0 Comments Average Poor Excellent Good Very Poor Does the accomodation look secure - secure doors/windows, evidence of reaskins (may get info itom Uses 'Suveys)

The separate changing comes for each team - can accomodation be seed by both male and female teams at same time s the site close to public transport links, proximity to bus stop, train Assessment Criteria (please rank each of the following aspects for each pitch with an "X" in the coloured box to the right of the chosen answer) Are there showers facilities, what is their quality (if known) Non Technical Visual Quality Assessment - Changing Accomodation there enough for circa 20 cars, bays marked out etc (Number of teams that can change at any one time in the facility) **Guidance notes** are there toilets - what is their condition (if known) mage to pavillion, graffiti, broken glass etc Less than 30% over 90% 60%-89% 40%-59% 30%-39% Assessment undertaken by: Date of Assessment: No changing Poor/ron Poor Poor å S Key: Yes - lots 2 Poor Yes-poor Yes-poor ò ŏ X Rating Average % Yes - some 0 Yes - OK Yes - OK Good Yes 4 Good Good Good **Total Score** ont of Yes - Good Yes - Good Excellent None 0 About the Changing Accomodation Capacity of changing rooms; Changing Accom Name inks to public transort Evidence of vandalism Segregated changing Element Site Name: Overall Quality Scoring: Site ID Security Parking Toilets

3) Individual pitch assessment form

Comments Upright, straight, painted, for football, goals are there safe net hooks at both ends. If posts are dismantle after game, or are removable goals, assume Eccellent, Non Technical Visual Quality Assessment - Individual Pitch Assessment Where, 90%+ grass cover should be given 'Excelent', less than 60% of is the wicket protected when not in use - can be roped off or covered. e.g. Have they been painted recently, are lines straight and clear etc. Does it meet the NGB standard? See pitch sizes tab for dimensions Does it meet the NGB standard? See pilch sizes tab for dimensions f no evidence, assume none. May wish to refer to user survey eg, golf divots, car-parking on field etc. If no evidence The ideal length of grass will vary between sports ining which takes place on the pitch area eg nets/ goels/ grids off main body of pilich is the pitch served by changing facilities Assessment Criteria (please rank each of the following aspects for each pitch with an 'X' in the coloured box to the right of the chosen answer) **Guidance notes** Number of games cancelled due to unfitness of pitch (excluding frozen pitches) % of games cancelled per season A good pitch An average pitch A below average pitch A poor pitch Site Name: No - not adequate No - not adequate Severe Very Poor Yes - lots Yes - lots Yes - lots Yes - lots Very Poor Pitch Type; %09> Poor 4 Poor å å å Key; 90%+ 64-90% 55-64% 30-54% Less than 30 Yes - some Yes - some Yes - some Yes - some 2 to 4 hrs No- but adequate Poor No- but adequate Good Good Number of games played on pitch each season Gentle 70-84% 1 to 2 hrs 85-94% Slight Good Yes Yes Yes Yes - fully Yes - fully Excellent Excellent None None None 9 6 Flat 19 Excellent >94% ### out of 0 aining; Estimated number of hours per week in season slope of pitch / cricket outfield (gradient and cross fall) Cricket Only - Is the wicket protected when not used ## About the winter pitch/cricket field Problem Areas: Evidence of Glass/ stones/ litter blem Areas: Evidence of Damage to surface blem Areas: Evidence of Unofficial use About the equipment/ wicket... Appendix E- List of data sources

Primary data sources

- Trafford Football Sites Providing Community Use List of sites with breakdown of pitch numbers into Senior, Junior, Mini and 9v9. Sorted by TCLT managed sites, TMBC leased sites and TCLT partner sites (no date).
- Discussion about football, all weather pitches and athletics pitches with Trafford Sports Development (15 January 2008).
- Trafford Sports Club Directory List by sport type of known clubs in Trafford (16 May 2007).
- Bowls List Details of bowling greens with number of pavilions and greens (no date).
- Bowling Clubs List Details of bowling greens with number of pavilions and greens (22 November 2004).
- List of MUGA's and basketball courts from Parks & Countryside Service (11 March 2008).
- Outdoor Sports Facilities Study Appendix 1 of KKP study (Spring 2004).

Secondary data sources (used for checking for missed sites)

- Previous MapInfo Layer R:\GIS\Maproot\Environmental Services IBU\Parks & Countryside\Greenspace 2004 mapping\outdoors_sports_facs.TAB
- Local Land & Property Gazeteer (LLPG) Accessed via the intranet with searches done on bowling, tennis and cricket.
- OS MasterMap Cartographic Text This is the text that appears on MasterMap labeling land coverage e.g. "Tennis Court". Points plotted for the following texts: Tennis, Tennis Court, Bowling, Bowling Green and Cricket Ground.
